EDUCATION

VNR Vignana Jyothi Institute of Engineering and Technology

B.Tech in Computer Science Engineering - **CGPA: 9.52/10**

Dec 2020 – Apr 2024

Hyderabad, India

EXPERIENCE

Oracle

Software Engineer – Automation & Infrastructure

Aug 2024 – Oct 2025

Hyderabad, India

- Automated **100+ ASAP service-activation workflows** in **LISA** across **2 release regression cycles** by reworking test data, prerequisites, and assertions, reducing a representative regression cycle by **80% (5 days to 1 day)**.
- Expanded integration coverage across **HTTP, JMS, HTTPS, LDAP, and Dynamic Routing** by adding LISA tests, resolving SSL and environment blockers, and completing **25+ web-service cases** for ASAP 7.4.1.
- Resolved a **Dynamic Routing issue** that left ASAP work orders stuck in **InProgress** through a targeted cartridge fix, then added **LISA regression cases** covering the affected workflow and successful order processing.
- Debugged distributed work-order failures across **Kubernetes, WebLogic, and Oracle DB** by correlating logs, component settings, and connectivity to distinguish product defects from configuration and test-data issues.
- Upgraded platform dependencies across **3 private K8s clusters** using Kubernetes, Helm, Podman, and WebLogic Kubernetes Operator while verifying compatibility with deployed ASAP instances during rollout.
- Configured **Order Balancer** in SSL and non-SSL environments, set up **WebLogic certificates**, and validated REST endpoints and work-order submissions using **Postman** across newly provisioned ASAP environments.
- Updated **Java, WebLogic, and Oracle 19c DB Client** environments across **3 quarterly patch cycles**, then ran certification and regression checks to verify ASAP services and work-order processing after each update.

Oracle

Project Intern

Jan 2024 – Jul 2024

Hyderabad, India

- Restored **LISA automation** for ASAP web services, JMS/XML, LDAP, and Dynamic Routing by updating test data, environment properties, and execution steps for newer **on-premises and cloud-native environments**.
- Resolved **SSL, endpoint, and component-configuration issues** in Linux and WebLogic test environments, unblocking LISA regression runs for Oracle ASAP components and work orders on-premises and in Kubernetes.

PROJECTS

Professional Networking System | *Spring Boot, Kafka, Neo4j, PostgreSQL*

- Built **7 Spring Boot components** with JWT-protected routes and service discovery for authentication, posts, connections, notifications, and media uploads.
- Implemented **Neo4j connection requests and first-degree queries** with duplicate-request safeguards.
- Published **Kafka events** for post and like notifications across separate services.

Speaker Diarization System | *Python, Flask, Whisper, SpeechBrain* | [GitHub](#) | [SSRG IJEEE 2025](#)

- Built a **Whisper and SpeechBrain** pipeline for timestamped transcription and multi-speaker diarization.
- Developed a **Flask** backend for audio preprocessing, speaker embeddings, and spectral clustering.

TECHNICAL SKILLS

Languages: Java, C/C++, Python, JavaScript, SQL, Bash/Shell

Frameworks & APIs: Spring Boot, Spring Data JPA, REST APIs, Node.js, React, Flask

Databases & Messaging: Oracle DB, MySQL, PostgreSQL, Neo4j, Kafka, JMS

Cloud & Infrastructure: AWS (IAM, EC2, S3, CloudWatch), GCP, OCI, Linux, Kubernetes, Docker, Podman, Helm

Developer Tools: Git, GitLab, IntelliJ IDEA, Postman, LISA, Cline

ACHIEVEMENTS

- Awarded **Gold Medal** in Computer Science & Engineering - VNRVJIET (2024)
- LeetCode Knight** (Peak Rating - 2036) | **CodeChef** 3 Star | Top 3 in DSA - Smart Interviews | [Profiles](#)
- Oracle Cloud Infrastructure ([OCI](#)) Foundations & AI Foundations Certified ([OCI AI](#))
